## FULL STACK DEVELOPER

I am a dedicated and passionate MERN stack developer , with extensive hands-on experience gained through a self-driven internship over the past year. My journey in web development has equipped me with a strong foundation in both frontend and backend technologies, allowing me to tackle various challenges and deliver high-quality results.

## TECHNICAL SKILLS

|                   |                                  |
|-------------------|----------------------------------|
| <b>Languages</b>  | JavaScript,C,C++,Java,HTML,CSS   |
| <b>Frameworks</b> | : React.js,Express,Node.js :     |
| <b>Libraries</b>  | Redux,ReactRouter :              |
| <b>Databases</b>  | MongoDB,MySQL,Aws :              |
| <b>Dev Tools</b>  | VisualStudioCode,Git,GitHub,Jira |

## EXPERIENCE

|   |   |
|---|---|
| <b>WebDeveloperIntern</b><br><i>StackmodInnovations</i> | (1yearofexperience)July2023–Present<br><i>Onsite–Technopark,Trivandrum,Kerala</i> |
|---|---|

- Experience in developing and maintaining webapplications using MERNStack (MongoDB,Express.js, React.js,Node.js)
- Designed and developed dynamic and responsive websites using **HTML,CSS,JavaScript,Node,React**
- Worked with **RESTAPI** store trieve and display data from databases
- Strong knowledge of Database design, implementation and Optimization using MongoDB
- Implemented coding standards and version control for high-qualitycode.
- Worked with **MVC frameworks** to develop robust and scalable backends
- Trouble shot and **fixedbugs** and issues in the backend to ensure **smoothoperation** of the applications
- Worked on independent projects applying skill storeal-world scenarios.

## EDUCATION

|  |                                       |
|--|---------------------------------------|
| <b>Anna University</b><br><i>Bachelor of Engineering</i> | Nagercovile, TamilNadu<br>2017 – 2021 |
|--|---------------------------------------|

## PROJECTS

|   |                                     |                            |
|---|-------------------------------------|----------------------------|
| <b>Project1</b>   | <i>Healthcare Management system</i> | <a href="#">SourceCode</a> |
| <ul style="list-style-type: none"><li>• Developed a Healthcare Management System using NodeJS, UserAuthenticationusing JWTtoken, Google Authentication Configured Nodemailer for sending OTPs , Integrated multer middleware for file uploading, Utilized middleware for route authentication to restrict access to authenticated users only.</li></ul> |                                     |                            |
| <b>Project2</b>   | <i>ContactList Application</i>      | <a href="#">SourceCode</a> |
| <ul style="list-style-type: none"><li>• Implemented with React and Redux for state management, this project demonstrates effective handling of userdata and state updates.</li></ul>  |                                     |                            |
| <b>Project3</b>   | <i>Employee Management system</i>   | <a href="#">SourceCode</a> |
| <ul style="list-style-type: none"><li>• DevelopedanEmployeeManagementSystemusingNodeJS,ImplementedUserAuthenticationusingJWTtoken, Configured Nodemailer for sending OTPs , Integrated multer middleware for file uploading, Utilized middleware for route authentication to restrict access to authenticated users only.</li></ul>                     |                                     |                            |
| <b>Project4</b>   | <i>Blog Application</i>             | <a href="#">SourceCode</a> |
| <ul style="list-style-type: none"><li>• Developed a blog platform using React, enabling users to add and manage blog information efficiently.</li></ul>   |                                     |                            |
